

Collection points and specialist retailers Non-rod-shaped lighting equipment (<50cm) collecting and transporting

- Lighting equipment must be stored protected from the weather. Weather protection refers to fixed constructions such as buildings, roofs and lid containers. The collected material must be protected from the weather at the end of the working day.
- Breaking the lighting equipment must be avoided.
- The recycling company reserves the right to charge for additional work in the event of poor delivery quality.

Correct identification

- Lighting equipment, non-rod-shaped
- Lighting equipment, rod-shaped smaller than 50cm

Without packaging.
No rubbish.

Classification

Lighting equipment is classified as hazardous waste. Damage should be avoided. A data sheet is required. Reference to VeVA-Online or via recycling companies (subject to a charge).

Containers

SENS standard containers for lighting equipment or in consultation with SENS recycling companies.

Load securing

The containers must be filled in such a way that the goods cannot fall out. The SENS bag or collection box must be closed.

Labelling of the goods

The pallet or collection box must be labelled in accordance with ADR.

Transport

- Loading and unloading is the responsibility of the sender or recipient.
- There must be personnel present to load or unload.

Minimum collection quantity

- 1 pallet with 2 frames, incl. SENS bag
- 4 collection boxes
- Together with the other SENS waste electrical equipment
