

## Collection points and specialist retailers

### E-cigarettes

#### collecting and transporting

- E-cigarettes can be collected via specialist retailers in the vape recycling bag.
- For safety reasons, e-cigarettes can alternatively be placed with the batteries in the black INOBAT steel drums.
- E-cigarettes must be stored protected from the weather (under a roof). Weather protection refers to fixed constructions such as buildings, roofs and lid containers. The collected material must be protected from the weather at the end of the working day.
- The recycling company reserves the right to charge for additional work in the event of poor delivery quality.

### Correct identification

- Disposable e-cigarettes
- Reusable e-cigarettes
- Battery carrier for e-cigarettes

**Without** packaging.  
**No** rubbish.

## Classification

E-cigarettes typically contain a battery and are considered controlled waste. Exposure to heat, water and any kind of crushing must be avoided.

## Containers

- Vape recycling bag
- Black INOBAT steel drums according to INOBAT packaging proposal for lithium-ion batteries

## Load securing

The containers must be filled in such a way that the goods cannot fall out.

## Labelling of the goods

- The vape recycling bag does not need to be labelled.
- The black INOBAT steel drums must be labelled in accordance with INOBAT specifications.

## Transport

- Vape recycling bag: Collection takes place from the parcel box.
- Black INOBAT steel drums: Loading and unloading is the responsibility of the sender or recipient.
- There must be personnel present to load or unload.

## Minimum collection quantity

Collection points: 1 steel drum

Specialist retailers: 1 vape recycling bag
